**STRIVE25: SUSTAINABLE GROWTH
LEADERSHIP**

Forward-looking statements

The forward-looking statements contained in this presentation, including forecasts of sales and earnings performance, are not guarantees of future results and are subject to risks, uncertainties and assumptions that are difficult to predict. The forward-looking statements are based on Coloplast's current expectations, estimates and assumptions and based on the information available to Coloplast at this time.

Heavy fluctuations in the exchange rates of important currencies, significant changes in the healthcare sector or major changes in the world economy may impact Coloplast's possibilities of achieving the long-term objectives set as well as for fulfilling expectations and may affect the company's financial outcomes.

Solid 8% organic growth and 28% EBIT margin¹ in Q2. FY 2022/23 guidance narrowed: ~8% organic growth and 28-29% EBIT margin¹

REVENUE GROWTH

EBIT

Q2 2022/23 highlights

- Organic growth of 8% and reported growth in DKK of 10%
- Continued good momentum in Chronic Care (6% organic growth in both Ostomy and Continence Care) across regions ex. China, which detracted from growth in Ostomy Care due to COVID-19. Towards the end of Q2, hospital access and procedural volumes in China improved. Growth in Continence Care continued to be impacted by backorders in Collecting Devices
- Voice & Respiratory Care organic growth of 9% (2 months) with solid growth in Laryngectomy and Tracheostomy
- Strong double-digit growth and solid momentum in Wound Care and Interventional Urology (12% and 17% respectively), both including some benefit from a lower baseline last year
- EBIT¹ was DKK 1,671 million, down 1% from last year. The EBIT margin¹ was 28%, against 31% last year, reflecting input cost inflation, increased level of commercial activity, and amortisation costs. Neutral impact from currencies in Q2
- ROIC after tax before special items of 19% in H1 22/23, against 25% last year, due to the Atos Medical acquisition
- FCF was DKK 795 million in H1 22/23, a 13% decrease from last year (ex. acquisitions), impacted by a decline in cash flow from operating activities, mainly due to an increase in net working capital and higher income tax paid. Net working capital for FY 2022/23 is still expected around 24%
- Half year interim dividend of DKK 5.00 per share

FY 2022/23 financial guidance

- Organic revenue growth now expected around 8%, from previously 7-8%. Reported growth in DKK now expected at 8-9%, from previously 9-10%, due to negative impact from currencies of around -2%-points (previously expected around -1%-point). Atos Medical acquired growth contribution of 3%-points unchanged (4 months)
- Consequently, the reported EBIT margin before special items¹ is now expected at 28-29%, from previously 28-30%. The EBIT margin guidance continues to assume impact from increasing input costs
- CAPEX still expected at around DKK 1.4bn. Effective tax rate still expected around 21%

1) Before special items. Special items of DKK 20 million in Q2 2022/23 related to Atos Medical integration costs. FY 22/23 special items expected ~DKK 50 million for the Atos Medical integration. Special items of DKK 381 million in Q2 2021/22; DKK 300 million related to Mesh litigation provisions and DKK 81 million related to the Atos Medical acquisition

Strategic highlights from Strive25 – Sustainable growth leadership

Growth

US Chronic Care

- Strong performance in the US Ostomy Care business, where Coloplast continues to advance its competitive position
- Premier Inc. has renewed Coloplast's group purchasing agreement. The contract, which is multi-source, took effect on April 1, 2023, and is effective for three years

China reopening

- Coloplast is closely monitoring the market development in China and views the reopening as encouraging for the business on a mid- to long-term horizon
- China remains a key strategic market for Coloplast and an important contributor to Coloplast's organic growth ambition in the Strive25 period

Innovation

Chronic Care – Clinical Performance Programme

- **Luja™**, the new male intermittent catheter with a Micro-hole Zone Technology, has been launched in four markets, with positive initial feedback. The launch is progressing well, and the product is expected to be available in key markets over the next 9 months
- The results of the first pivotal clinical study have been published, showing a significant improvement in bladder emptying with Luja, compared to a competitor catheter*
- **Heylo™**, the new digital leakage platform, is in pilot launch in Germany and the UK and has been well-received by users. The clinical studies are on track and the product is expected to launch in 2023

Sustainability

Improving products and packaging

- Production waste recycling was 74% in H1 2022/23, up 10%-p from H1 2021/22. The solid progress reflects a continued scale up of the recycling partnership in Hungary

Reducing emissions

- Scope 1 and 2 emissions were reduced by 15% in H1 2022/23 vs. the base year 2018/19, positively impacted by the installation of electric heat pumps and electric equipment at production sites in Hungary and China in an effort to phase out natural gas

Responsible operations – employee engagement

- Employee engagement score of 8.1, ahead of the healthcare industry benchmark of 7.6

Operational efficiency

Global Operations Plan (GOP) 5 – Automation programme

- Due to delays from longer component lead times, the timeline of the GOP5 automation programme is now extended into Q1 2023/24, from previously end of FY 2022/23
- The ambition to release around 1,000 FTEs is unchanged

Global Business Support and IT landscape

- Positive scale effect driven by further utilization of Business Centre and IT infrastructure.
- The integration of Atos Medical IT and finance infrastructure is progressing well – IT infrastructure integration will be finalized in May
- Coloplast remains on track to deliver estimated run-rate operational synergies of up to DKK 100 million, with full impact from FY 2023/24

Solid 8% organic growth in Q2 with broad-based contribution from all business areas and regions excluding China

Q2 2022/23 revenue by business area

Business area	Reported revenue FY DKKm	Organic growth FY	Share of organic growth
Ostomy Care	2,204	6%	28%
Continence Care	1,964	6%	26%
Voice & Respiratory Care*	479	9%	6%
Wound & Skin Care	747	13%	19%
Interventional Urology	667	17%	21%
Coloplast Group	6,061	8%	100%

Q2 2022/23 revenue by geography

Geographic area	Reported revenue FY DKKm	Organic growth FY	Share of organic growth
European markets	3,444	6%	43%
Other developed markets	1,553	13%	38%
Emerging markets	1,064	9%	19%
Coloplast Group	6,061	8%	100%

*Part of organic growth since February 1, 2023

Ostomy Care grew 6% in Q2 with solid contribution from all regions ex. China. China detracted from growth due to COVID-19, as expected

Ostomy Care performance

Q2 2022/23 highlights

- All regions contributed to growth ex. China
 - Solid growth contribution from Europe, driven by the UK and Germany
 - Solid momentum in the US with double-digit growth and continued advancement of our competitive position. The renewal of Coloplast's group purchasing agreement with Premier Inc. took effect on April 1
 - Emerging markets ex. China continued the good momentum, led by LATAM
 - Sales in China declined in Q2, as expected, negatively impacted by COVID-19. Towards the end of Q2, hospital access in China significantly improved and approached pre-COVID levels, positively impacting procedural volumes and inflow of new patients
- From a product perspective, the SenSura® Mio portfolio, and in particular SenSura® Mio Convex, was the main growth contributor, followed by the Brava® range of supporting products

Continence Care grew 6% in Q2 with contribution from all segments and regions

Continence Care performance

Q2 2022/23 highlights

- Solid contribution to growth from all regions
 - Sales growth in Europe was driven by the UK and Germany
 - Continued good sales momentum in the US
 - Emerging markets also contributed to growth, driven by LATAM
 - Continued double-digit growth in markets with recent reimbursement openings, such as Poland, Australia, Japan and South Korea
- From a product perspective, the SpeediCath® intermittent catheters portfolio, in particular compact, standard, and flexible catheters, were the main contributors to growth
- Collecting Devices continued to be negatively impacted by backorders. The backorder situation is now resolved, and production will be back to full capacity in Q3
- Bowel Management contributed to growth led by solid growth in the US. Peristeen® Plus continues to perform well and has replaced Peristeen as the standard of care in markets where the product has been launched
- Coloplast is launching Luja™, the new CE-marked male intermittent catheter with a Micro-hole Zone Technology. Luja is currently launched in four markets, and expected to be available in key markets over the next 9 months

Voice & Respiratory Care delivered 9% organic growth in Q2 with solid momentum in both Laryngectomy and Tracheostomy

Voice & Respiratory Care performance

Q2 2022/23 highlights

- February 1, 2023, marked the one-year anniversary of the completion of the Atos Medical acquisition. The business has continued to perform in line with expectations (8-10% organic growth). The integration into Coloplast's infrastructure is also progressing well and on track to plan
- Voice and Respiratory Care delivered 9% organic growth (2 months)
 - Laryngectomy delivered high single-digit organic growth, driven by growth in new patients in existing and new markets, as well as an increase in patient value driven by the Provox® Life™ portfolio
 - Tracheostomy and ENT (Ear, Nose & Throat) delivered double-digit organic growth, with continued solid demand and positive impact from forward integration in key European markets
- All regions contributed to growth led by Europe and a solid contribution from the US. In Emerging markets, Poland made a solid contribution to growth as a result of a newly introduced reimbursement scheme for HMEs, following a four-year long market access project aimed at raising the standard of care for laryngectomy patients
- In April, Atos Medical announced the results of a new clinical study demonstrating significant improvement in pulmonary health and related symptoms when using Provox Life*

*Provox Life Ward - Atos Medical

Strong Q2 in Wound & Skin Care with 13% growth driven by solid momentum in Wound Care Europe, including benefit from a low baseline

Wound & Skin Care performance

Q2 2022/23 highlights

- Wound Care in isolation grew 12% despite continued negative impact from backorders, as expected
 - The backorder situation has been resolved and production will gradually ramp up to full capacity in H2 2022/23
 - Solid growth momentum in Europe driven by the Biatain Silicone portfolio in Germany, France, and the UK. The region also benefited from a low baseline last year
 - China returned to growth in Q2 driven by significantly improved hospital access, resulting in an increase in procedural volumes and demand for wound care products
- The Compeed contract manufacturing business continued to perform well and contributed significantly to growth, reflecting a healthy consumer demand
- Skin Care returned to growth in Q2, coming from a lower baseline last year

Strong momentum in Interventional Urology with broad-based growth of 17%, led by the US Men's Health business

Interventional Urology performance

Q2 2022/23 highlights

- Growth in the quarter was driven by continued strong momentum across business areas and geographies, as well as positive impact from a lower baseline in the US last year
 - Men's Health was the largest contributor to growth in Q2 driven mainly by the Titan[®] penile implants in the US
 - Endourology in Europe and Women's Health in the US also made a solid contribution to growth
- Coloplast has launched its first laser equipment, Thulium Fiber Laser (TFL) Drive, in key markets. The launch is off to a good start with positive customer feedback
 - The launch is part of Coloplast's strategy to expand into adjacent segments, and enables Coloplast to compete in the lasers market, worth an estimated DKK 3 billion

Q2 reported growth was up 10%, with ~3%-points impact from the Atos Medical acquisition and ~1%-point negative currency effect

Q2 2022/23 Revenue development (DKKm)

Q2 2022/23 highlights

- Organic growth was 8% or DKK 453 million, driven by:
 - Continued solid momentum in Chronic Care across regions, excluding China
 - China detracted from Ostomy Care growth due to COVID-19, as expected
 - Continence Care continued to be impacted by backorders in Collecting Devices
 - Voice & Respiratory Care delivered solid growth driven by both Laryngectomy and Tracheostomy
 - Strong Q2 in Wound & Skin Care driven by solid momentum in Wound Care Europe, including benefit from a low baseline
 - Continued strong momentum in Interventional Urology with broad-based growth, led by the US Men's Health business
- Acquired revenue contributed 3%-points to reported growth or DKK 155 million (1 month impact from the Atos Medical acquisition)
- Foreign exchange rates had a negative impact of DKK 50 million or -1%-point on reported growth, mainly related to depreciation of the GBP and several emerging markets currencies against DKK

Reported EBIT margin of 28%¹ in Q2, reflecting inflationary headwind on input costs, increased level of commercial activity, and amortisation costs

Q2 2022/23 EBIT margin development before special items (%)

¹ Before special items of DKK 20 million in Q2 2022/23 related to integration costs for the Atos Medical acquisition, and DKK 381 million in Q2 21/22, of which DKK 300 million related to Mesh litigation provisions and the remaining DKK 81 million related to the Atos Medical acquisition (one-off transaction costs, legal and advisory fees)

Q2 2022/23 highlights

- Gross margin was 66%, against 69% in Q2 last year
 - Negative impact from:** input cost inflation (raw materials, energy, freight), double-digit wage inflation in Hungary, ramp-up costs in Costa Rica, and cost related to backorder resolution. Electricity price hedges of ~400 EUR/MWh (double from last year) took effect in January. **Positive impact from:** Atos Medical, price increases, country and product mix, and operating leverage and efficiency savings
 - Limited positive FX impact on the gross margin of 30 bps
- Operating expenses in Q2 amounted to DKK 2,356 million. Operating expenses grew 8% from last year excl. inorganic operating expenses from Atos Medical (12% incl. inorganic OPEX). Atos Medical contributed with DKK 280 million, including DKK 53 million in amortisation costs.
- Distribution-to-sales ratio was 31%, compared to 29% last year
 - Distribution costs were up 16% vs. last year, driven by Atos Medical, increased sales & marketing activities and travel post COVID-19, higher logistics costs, and continued commercial investments (Interventional Urology, consumer and digital, Atos Medical)
- The admin-to-sales ratio was 5%, on par with last year. The R&D-to-sales ratio was 3%, compared to 4% last year
- EBIT before special items was DKK 1,671 million, a 1% decrease from last year. Reported EBIT margin before special items was 28% compared to 31% last year (neutral impact from FX)

Adj. FCF in H1 was DKK 1,137 million. Operating cash flow impacted by increased working capital; NWC-to-sales still expected at 24% for FY

FCF development¹

H1 2022/23 highlights

- Free cash flow for H1 2022/23 was an inflow of DKK 795 million compared to an outflow of DKK 9,715 million in the same period last year
- Excluding acquisitions last year, the FCF decreased by DKK 123 million (13%) from DKK 918 million in H1 2021/22, driven by a decline in cash flow from operating activities. Adjusted for Mesh payments and the US Veteran Affairs matter³ payment, the H1 2022/23 FCF was an inflow of DKK 1,137 million
 - Operating cash flow for H1 2022/23 was DKK 1,176 million, compared to DKK 1,381 million last year, due to higher income tax paid and an increase in working capital
 - Reported EBIT before special items was DKK 110 million (3%) higher than H1 2021/22
 - NWC-to-sales of 26% compared to 25% at year-end 2021/22, mostly impacted by an increase in inventories. NWC-to-sales for the year still expected around 24% of revenue
- CAPEX-to-sales ratio of 5%, compared to 4% last year
 - H1 CAPEX was driven by investments in automation at volumes sites as part of GOP5, IT investments, and Atos Medical capex and integration capex

1) FCF adjustments: H1 2022/23 Mesh payments and payment related to the formal resolution of the US Veteran Affairs matter; FY 2021/22 adjusted for acquisitions, mostly Atos Medical and Mesh payments; FY 2020/21 adjusted for acquisitions and Mesh payments; FY 2018/19 adjusted for Mesh payments; FY 2017/18 adjusted for Mesh payments and acquisitions. 2) Cash Conversion calculated as FCF ex. Mesh payments, interest payments, tax payments, M&A and marketable securities relative to EBIT before special items. Cash Conversion is trailing twelve months. 3) Formal resolution of the US Veteran Affairs matter of incorrect management of contractual obligations related to past agreements, uncovered and disclosed to authorities in FY 2016/17

FY 2022/23 guidance narrowed – organic growth of around 8% and reported EBIT margin of 28-29%¹

	GUIDANCE 2022/23	GUIDANCE (DKK)*	KEY ASSUMPTIONS
SALES GROWTH	Around 8%	8-9%	<ul style="list-style-type: none"> Chronic Care ex. China expected to grow largely in line with Strive25 ambitions: Europe – continued good momentum; US – sustained good momentum in Ostomy Care and improvement in growth in Continence Care; Emerging markets – broad based double-digit growth ex. China Wound and Skin Care – growth above market in line with Strive25 ambitions China (OC and WC) – impact from COVID-19 in H1 2022/23, and expected improvement in growth in H2 2022/23, mostly driven by a lower baseline last year, as well as improved hospital access and procedural volumes towards the end of Q2. In Ostomy Care, a gradual improvement in inflow of new patients is expected. Average value per patient expected to remain below pre-COVID levels Interventional Urology – expected to grow around 10% Voice & Respiratory Care – expected to grow at 8-10% (8 months impact on organic growth) Russia – revenue expected to be on par with FY 2021/22 (1% of group revenue) with negative growth No current knowledge of significant healthcare reforms; positive pricing impact expected Stable supply and distribution of products – backorder impact in Collecting Devices in H1 2022/23 and Wound Care in the first nine months of 2022/23 Reported growth in DKK assumes negative impact from currencies of around 2%-points and 3%-points contribution from the Atos Medical acquisition
EBIT MARGIN		28-29% (before special items)	<ul style="list-style-type: none"> Increased input cost: raw materials – double-digit price increase, energy costs – around double vs. 2021/22 (~60% of electricity consumption for H2 hedged at ~400 EUR/MWh), double-digit wage increase in Hungary Negative impact from currencies Leverage effect on fixed costs and continued efficiency improvements through GOP5 Prudent management of OPEX – expected to grow below reported revenue growth (excl. acquired growth) Amortisation charges related to the Atos Medical acquisition of around DKK 230 million Special items of around DKK 50 million related to Atos Medical integration costs
CAPEX (DKKm)		Around 1.4bn	<ul style="list-style-type: none"> Investments in automation at volume sites in Hungary and China as part of GOP5 Investments in new machines for existing and new products IT and sustainability investments Atos Medical capex and integration capex
TAX RATE		Around 21%	<ul style="list-style-type: none"> Positive (one-off) impact from Atos Medical IP transfer

FY 2022/23 guidance breakdown: significant negative impact from input cost increases on EBIT margin

Revenue growth assumptions

FY 2022/23 organic growth expected at around 8% in constant currencies

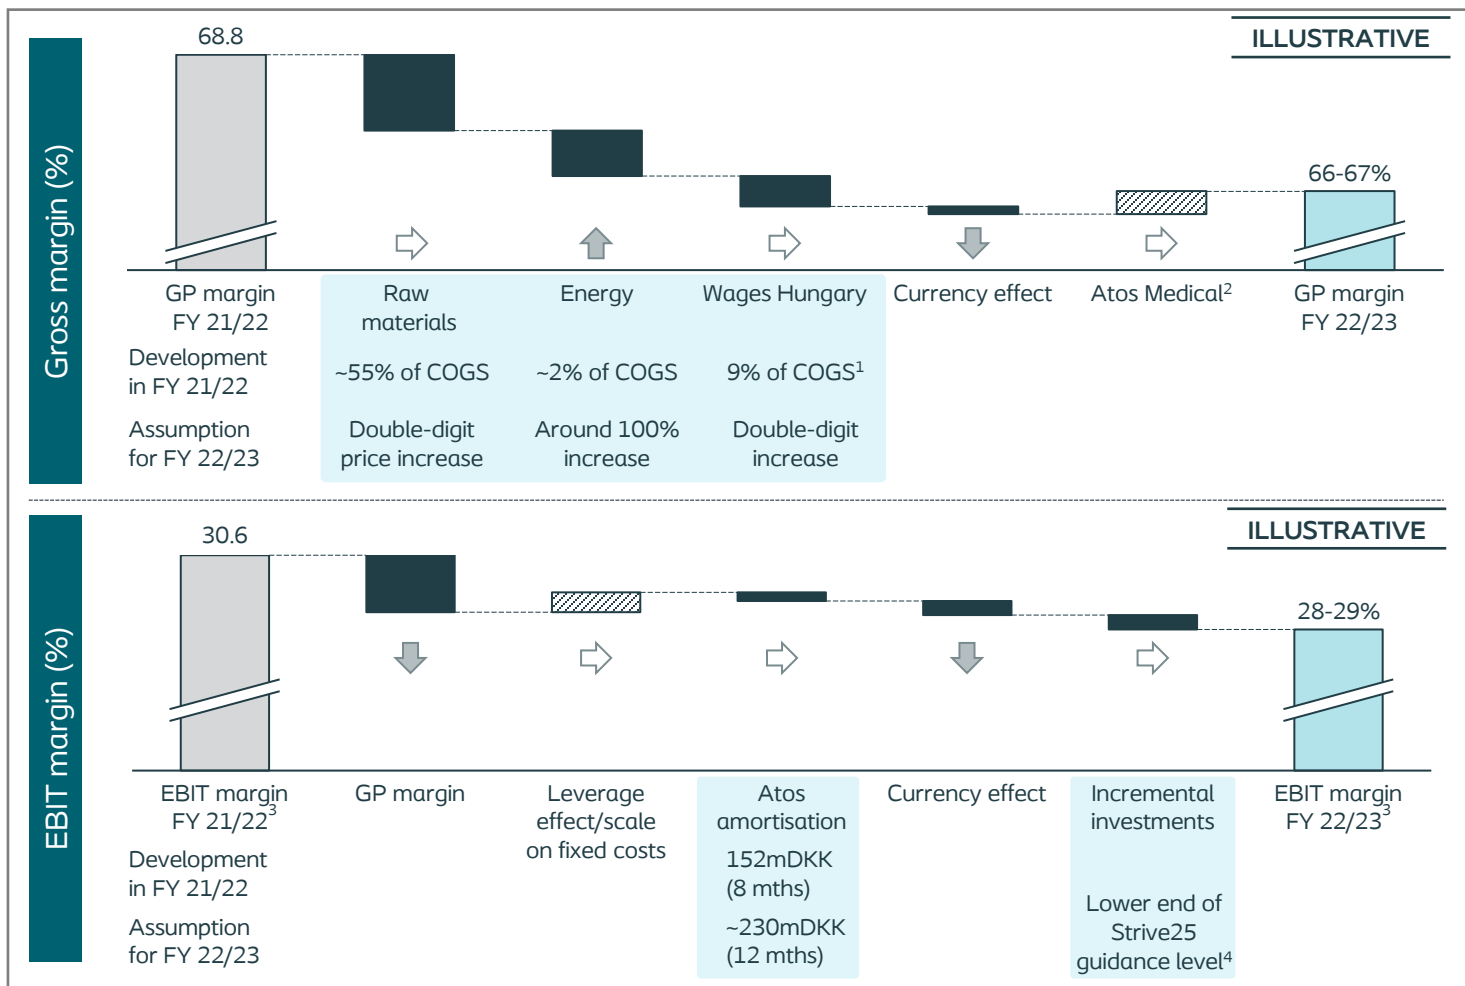

- China Ostomy Care and Wound Care – negative impact from COVID-19 in H1 and expected improvement in growth in H2, mostly due to a lower baseline last year, as well as improved hospital access and procedural volumes towards the end of Q2
- US – sustained momentum in Ostomy Care, and improvement in Continence Care growth driven by the normalisation of growth in new patients to pre-COVID levels in H2 21/22
- Interventional Urology expected to grow around 10%
- Voice & Respiratory Care expected to grow 8-10%, with 8 months impact on organic growth

Key impacts on gross- and EBIT margin development in 2022/23

Development since issue of FY guidance

Positive ↑ Unchanged ⇨ Negative ↓

¹) Direct salaries as % of total COGS. 80% of production volumes are in Hungary. ²) 4 months incremental impact in 2022/23. ³) Before special items. Special items of DKK 471 million in FY 21/22, of which DKK 300 million related to Mesh litigation provisions and the remaining DKK 171 million related to the Atos Medical acquisition. Around DKK 50 million integration cost expected in FY 2022/23, to be treated as special items. ⁴) Strive25 guidance: Investments of up to 2% of sales in incremental OPEX investments

UTI Risk Factor Model¹

UTI risk factors addressed by Luja™

Adapted from ¹Kennelly et al 2019: Adult Neurogenic Lower Urinary Tract Dysfunction and Intermittent Catheterisation in a Community Setting: Risk Factors Model for Urinary Tract Infections.

Comprehensive clinical program behind Luja™ to demonstrate the clinical relevance and difference

✓ Pre-clinical studies

In-vivo and *in-vitro* animal models used to optimize technology features and document the effect.

✓ Pilot studies

8 studies comparing Luja vs. conventional catheters¹ involving 160+ users, demonstrating

number of flow-stops and residual volumes at first flow stop significantly lower with micro-hole zone catheters as compared to conventional catheters

✓ Pivotal studies

2 multinational pivotal studies² involving 110+ users demonstrating the impact on the key risk factors of UTIs

Multicenter, randomised cross over trials comparing Luja™ vs standard of care

Endpoints: Residual volume, Flow stops, Blood in urine, QoL

- *The first pivotal study* showed significant improvement in bladder emptying with Coloplast's Luja™ compared to competitor catheter*
- *The second study has been finalized and Coloplast expects to publish the results within the next few months*

¹ Clinicaltrials.gov references: NCT03337048, NCT04633291, NCT04231149, NCT04250987, NCT04445051, NCT04543136, NCT04557787, NCT05224544.

² Clinicaltrials.gov references: NCT05485935, NCT05485922

* [Study shows significant improvement in bladder emptying with Coloplast Luja™ compared to competitor catheter](#)

Profitability supported by scalability and efficiency gains enabling additional innovation and commercial investments

Gross Profit development, %*

YTD 22/23 Gross Profit negatively impacted by inflationary headwind on input costs (raw materials, energy, freight, labour)

*Atos Medical included in FY 21/22 with eight months of impact. Long-term expectations include Atos Medical

Cost item

Development, in % of revenue*

Distribution

Admin

R&D

FY 21/22 and YTD 22/23 cost items include impact from the Atos Medical acquisition, of which DKK 152m and DKK 107m respectively in amortization costs (included under distribution cost)

Automation, procurement and scale are key to bringing Global Operations to the next level

1. Automation to mitigate growth in blue-collar FTE

- Due to longer component lead times, the timeline of the programme is extended into Q1 2023/24

DKK ~450m
CAPEX investment over four years (19/20 – 22/23)

2. Continuously work with procurement costs and supply risk mitigation

- Run sourcing tenders
- In 2022/23 we expect double-digit raw materials price increase

Costs levels to remain at 19/20 levels

3. Efficiency and scale on global functions

Global functions

Volume output

1) FY 2021/22 Cost of goods sold, DKK 7,050m

A global Business Support and IT landscape enables Coloplast to scale faster and efficiently and integrate Atos Medical into the Group

Global Business Services

Global business services handle the majority of all global support

EBIT margin development continues to be a function of growth, scalability, cost discipline and investment activity

EBIT margin (%)

Illustrative

1) Constant exchange rates

Future drivers of EBIT margin

EBIT will be positively impacted by:

- + Leverage effect on fixed costs e.g. distribution, admin and R&D costs especially driven by Europe

EBIT will be negatively impacted by:

- ÷ Investments in P/L (Commercial & R&D)

Headwind on gross margin from increasing prices for raw materials, energy, freight, and wage inflation in Hungary in FY 2021/22 and FY 2022/23

Continued strong development in free cash flow during the Strive25 strategy period

Taxation

— Reported tax rate

- DK statutory corporate tax rate lowered to 22% in 2016. Coloplast pays the majority of its tax in Denmark
- Coloplast tax rate expected to be ~23% for the Strive25 strategy period
- FY 22/23 tax rate expected around 21% due to positive impact from Atos Medical IP transfer

Net working capital

— Net working capital, % of revenue

- Long- term Net working capital expected to be stable at ~24%, impacted by:
 - Growth in mature markets
 - Growth in Emerging markets which have long credit times
 - Increasing inventory levels on strategic raw materials and products
- H1 22/23 NWC-to-sales impacted mainly by increased inventories, as well as timing of trade payables. FY 22/23 expected at around 24%

CAPEX²

■ CAPEX DKKm

— Depreciation and amortisation, % of revenue

— CAPEX, % of revenue

- CAPEX-to-sales expected to be 4-6% in Strive25
- Continued investments in machines & capacity expansion
- Widening & diversifying manufacturing footprint: volume sites in Costa Rica became operational in 20/21 & 21/22
- GOP5 investments - automation in Hungary and China
- IT investments and sustainability investments
- Atos CAPEX integration costs of up to DKK 150 million split over 21/22-23/24 (vast majority will be IT CAPEX)
- Full year impact of ~DKK 230 million of amortisation related to the Atos Medical acquisition in 22/23

We will continue to provide attractive cash returns despite investments in commercial activities and the Atos Medical acquisition

Coloplast cash distribution to investors

Highlights

- Coloplast returns excess liquidity to shareholders in the form of dividends and share buy-backs
- Dividend is paid twice a year – after the half-year and full-year financial reporting
- Total dividend of DKK 20.00 per share for 2021/22 compared to DKK 19.00 per share for 2020/21
- Coloplast will pay a half year interim dividend of DKK 5.00 per share
- The share buy-back programme serves to hedge employee share options
- A new share buy-back program will not be initiated in FY 2022/23 as treasury shares are sufficient to hedge the outstanding employee share options

1) Dividends paid out in the year are the actual cash payments of which the majority relates to dividend proposed in the previous financial year.

2) Pay-out ratio calculated as dividend proposed in the financial year/net profit for the financial year. Pay-out ratio for 2021/22 is before special items related to Mesh litigation and Atos Medical acquisition. 2020/21, 2018/19 and 2015/16 is before special items related to Mesh litigation. After special items, the pay-out ratio for 21/22 was 90%

In sum, we believe Coloplast can continue to deliver stable shareholder returns through ...

Organic growth and EBIT margin development

FCF and ROIC development

Highlights

- Stable market trends in our Chronic Care business
- Innovative product portfolio and new product launches
- Strong Coloplast Care retention program and innovative DtC activities
- Increased focus on growing the business outside Europe
- Additional improvements in manufacturing by leveraging global operations footprint
- European leverage will provide funds for further investments in sales initiatives
- Resulting in strong free cash flow generation and high return on invested capital
- ROIC FY 21/22 and H1 22/23 impacted by the recent acquisition of Atos Medical

1. FCF adjusted for Mesh payments in 2013/14, 2014/15, 2015/16, 2016/17, 2017/18, 2018/19, 2020/21, 2021/22, YTD 2022/23 and acquisitions in 2016/17, 2017/18 and 2020/21 and 2021/22. YTD 2022/23 adjusted for payment related to the formal resolution of the US Veteran Affairs matter Adjustment for Mesh payments includes DKK 500m insurance coverage in 2013/14 and 2014/15 combined. 2. Before special items. Special items include: 2013/14 DKK 1bn net provision; 2014/15 DKK 3bn provision; 2015/16 DKK 0.75bn provision; 2018/19 DKK 0.4bn provision; 2020/21 DKK 0.2bn provision; 2021/22 DKK 471m, Mesh litigation provisions and Atos Medical integration costs; YTD 2022/23 DKK 33m, Atos Medical integration costs

Introduction to Atos Medical

The global market leader in
laryngectomy

Atos Medical is the global pioneer within Laryngectomy and has shaped the market for the past +30 years

Key market and business highlights

~50,000	New total laryngectomies per year
~85%	Global Laryngectomy market share
30	Countries with direct presence
~50%	of revenues from Direct to consumer sales
~1,100	Employees globally

Atos product segments

Lary	Heat- and Moisture Exchanger (HMEs)	
	Adhesives (Adh)	
	Voice Prostheses (VP)	
	Accessories	
Tracheostomy & ENT		

Revenue by segment and geography

■ Laryngectomy
■ Tracheostomy & Other

■ Europe
■ North America
■ RoW

1) Pro-forma revenues and adjusted EBITDA calculated by Coloplast, including TRACOE medical GmbH and Kapitex Healthcare LTD (together "Tracoe"). Atos closed the Tracoe transaction on October 1st 2021.

2) Includes impact from the Tracoe acquisition

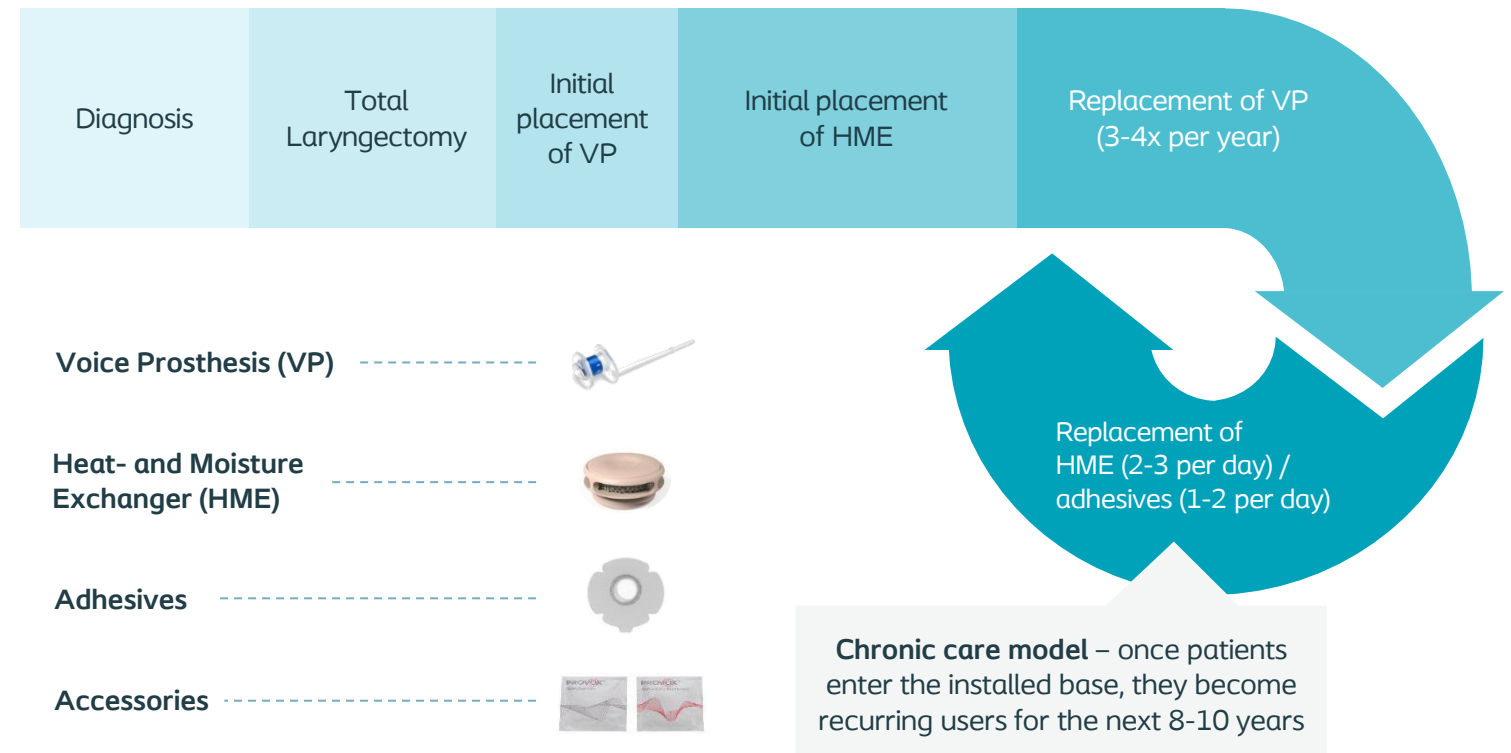

Atos improves the lives of patients following Total Laryngectomy procedures

A Total Laryngectomy is a non-elective surgery performed in the advanced stages of cancer

- Treatment of advanced laryngeal and hypopharyngeal cancer
- The procedure involves removing the voice box, also called the larynx
- The upper and lower airways are also permanently disconnected, which leads to a loss of the upper airway functions (humidification, heating and filtration of inhaled air, olfaction)

After surgery, a Voice Prosthesis (VP) is inserted by a healthcare professional, and the patient applies the Heat- and Moisture Exchanger (HME) and adhesives themselves

There is significant untapped potential in the laryngectomy market today, which we will seek to eliminate

The laryngectomy market, DKKbn

Low level of market penetration due to:

- 01 Lack of clinical standards in existing markets outside of Northern Europe
- 02 Patients are not compliant in their use
- 03 Lack of reimbursement in most of emerging markets

We will eliminate the 'white space' by:

-  Setting the clinical standards and increasing penetration in existing markets, such as the US
-  Increasing compliance in existing markets
-  Opening and developing new markets, such as Brazil, South Korea and China

Tracheostomy patients have similar needs as Laryngectomy patients, as they are both breathing through a neck stoma

A Tracheostomy is a surgical procedure that creates an opening in the neck for direct access to the windpipe (trachea) to facilitate breathing

- Performed when the airways are restricted, e.g., during an emergency when the airways are blocked, or when a disease or other problem makes normal breathing impossible
- Can be temporary or permanent
- After a tracheostomy patients have a tracheostoma, with a tracheostomy tube entering the windpipe. This changes the way of breathing and speaking.

The Tracheostomy patient journey starts with a cannula insertion, which can be reversed at any stage

Tubes/cannulas

Heat- and Moisture Exchanger (HME) and Speaking devices

Accessories

- There are around 1 million tracheostomy procedures each year
- The market today mainly consists of tubes used for breathing. Market growth estimated between 3-5%
- Permanent tracheostomy patients have similar product needs as laryngectomy patients (HMEs, accessories), and many today do not receive the highest standard of care

Atos Medical financial assumptions

Organic growth and EBITDA margin	<ul style="list-style-type: none"> Organic growth 8-10% EBITDA margin in the mid-30s level
EPS impact	<ul style="list-style-type: none"> Increasingly EPS accretive from FY 2022/23
Synergies	<ul style="list-style-type: none"> Estimated run-rate operational synergies of up to DKK 100m from utilising Coloplast infrastructure with full impact estimated from FY 2023/24
Financing	<ul style="list-style-type: none"> Structured as a 100% cash payment financed through debt financing The blended interest rate for the debt financing package is expected around 2.9% in FY 2022/23, achieved through the bond issuance, hedges on the 8-year tranche and the 5-year tranche, as well as the secured interest rate on the credit facility
Integration, transaction and financing costs	<ul style="list-style-type: none"> One-off transaction and integration costs including legal fees, advisory fees and insurance costs etc., and P&L integration costs of around DKK 171m in FY 2021/22, treated as special items. An additional DKK ~50 million in special items expected in 2022/23. Capex integration costs of up to DKK 150m split over 21/22-23/24, of which the vast majority IT capex.
Impact on balance sheet and capital allocation policy	<ul style="list-style-type: none"> By the end of Strive25, leverage is expected to be within the target range of 1-2x NIBD/EBITDA No changes to Coloplast's capital allocation policy to return excess liquidity through dividends and share buy-back. Updated target payout ratio of 60-80% of net profit
Purchase Price Allocation	<ul style="list-style-type: none"> Around 75% of the purchase value will be treated as goodwill. The remaining 25% will be treated as intangibles, to be amortised over approximately 15 years
Deal timing	<ul style="list-style-type: none"> Closed on 31 January, 2022

The Coloplast share (COLO-B.CO)

Coloplast share listed on **Nasdaq Copenhagen** since 1983

~**206.9 billion DKK** (~30 billion USD) **market cap** @ ~974.2 DKK per share (incl. A shares)

Two share classes:

- 18m **A shares carry** 10 votes (family)
- 198m **B shares carry** 1 vote (freely traded)
- **Free float approx.** 54% (B shares)

Note: Share capital ownership as per September 2022

¹ Holders of A shares and family hold 68% of the votes in Coloplast

Capital structure

Comments

- Overall policy is that excess liquidity is returned to shareholders through a combination of dividends and share buy-backs
 - Bi-annual dividends
 - Share buy-backs of DKK 500m per year expected – no buy-back planned for FY 2022/23
- Interest bearing debt will only be raised in connection with a major acquisition, such as Atos Medical, or other special purposes
 - In relation to the Atos Medical acquisition, Coloplast made a Eurobond issuance of EUR 2.2bn and obtained a credit rating of BBB by S&P Global Ratings
- FY 21/22 and YTD 22/23 increase in Net interest bearing debt (NIBD) driven primarily by the Atos Medical acquisition
- FY 22/23 NIBD/EBITDA expected to be around 2x

Net interest-bearing debt

1) Before special items of DKK 400m and DKK 200m provision related to US Mesh litigation in Q4 2018/19 and Q2 2020/21, respectively. FY 21/22 before special items of DKK 471m, DKK 300m related to provision for Mesh litigation and DKK 171m related to the Atos Medical acquisition. H1 2022/23 before special items of DKK 33 million related to integration costs for the Atos Medical acquisition

Solid organic growth of 8% in H1 2022/23 with solid momentum across business areas and geographies, excluding China

H1 2022/23 revenue by business area

Business area	Reported revenue FY DKKm	Organic growth FY	Share of organic growth
Ostomy Care	4,478	7%	36%
Continence Care	3,951	6%	29%
Voice & Respiratory Care*	959	9%	3%
Wound & Skin Care	1,425	7%	12%

Coloplast Group	12,166	8%	100%

H1 2022/23 revenue by geography

Geographic area	Reported revenue FY DKKm	Organic growth FY	Share of organic growth
European markets	6,878	6%	43%
Other developed markets	3,187	11%	36%
Emerging markets	2,101	9%	21%
Coloplast Group	12,166	8%	100%

*Part of organic growth since February 1, 2023

H1 reported growth was up 14%, with ~6%-points impact from the Atos Medical acquisition and limited contribution from currencies

H1 2022/23 Revenue development (DKKm)

H1 2022/23 highlights

- Organic growth was 8% or DKK 804 million, driven by:
 - Solid growth in Chronic Care across regions, ex. China
 - China detracted from growth in Ostomy Care, as expected, negatively impacted by COVID-19
 - Continence Care growth was driven by solid performance of the Intermittent Catheters portfolio, partly offset by Collecting Devices which detracted from growth due to backorders
 - Solid performance in Voice & Respiratory Care, with contributions from both Laryngectomy and Tracheostomy
 - Wound Care performance driven by good momentum in Europe, partly offset by negative impact from backorders
 - Strong momentum in Interventional Urology with broad-based growth, led by the US Men's Health business
- Acquired revenue contributed 6%-points to reported growth or DKK 633 million, reflecting 4 months impact from Atos Medical
- Foreign exchange rates had limited impact on reported growth (positive impact of around 50 bps), mainly related to appreciation of the USD against the DKK

Reported EBIT margin of 28%¹ in H1, reflecting an impact from cost inflation, increased level of commercial activity and amortisation costs

H1 2022/23 EBIT margin development before special items (%)

¹ Before special items of DKK 33 million in H1 22/23 related to integration costs for the Atos Medical acquisition, and DKK 415 million in H1 21/22, of which DKK 300 million related to Mesh litigation provisions and the remaining DKK 115 million related to the Atos Medical acquisition (one-off transaction costs, legal and advisory fees)

H1 2022/23 highlights

- Gross margin was 67%, against 69% in H1 last year
 - Negative impact from:** input cost inflation (raw materials, energy, freight), double-digit wage inflation in Hungary and ramp-up costs in Costa Rica
 - Positive impact from:** Atos Medical, price increases, country and product mix, operating leverage, and efficiency savings
- Positive FX impact on gross margin of around 70 bps
- Operating expenses in H1 amounted to DKK 4,728 million. Operating expenses grew 9% from last year excl. inorganic operating expenses from Atos Medical (19% incl. inorganic OPEX). Atos Medical contributed with DKK 570 million, including DKK 107 million in amortisation costs
- Distribution-to-sales ratio was 31%, compared to 29% last year
 - Distribution costs were up 20% vs. last year, impacted by Atos Medical, increased sales & marketing activities and travel post COVID-19, higher logistics costs, and continued commercial investments (Interventional Urology, consumer and digital, Atos Medical)
- The admin-to-sales ratio was 5%, compared to 4% last year. The R&D-to-sales ratio was 3%, compared to 4% last year
- EBIT before special items was DKK 3,445 million, a 3% increase from last year. Reported EBIT margin before special items was 28% compared to 31% last year (positive impact of 50 bps from FX)

Hedging Policy

To achieve the objective of a stable income statement we hedge:

- Key currencies e.g., USD, GBP, HUF using forward contracts and options. Not EUR.
- On average 10-12 months
- Selected balance sheet items in foreign currency and part of the expected rolling 12-month cash flows
- Taking risk. vs. cost of hedging into consideration

1) Average exchange rate from October 1 2021 to September 30 2022

2) The hyperinflationary economy in Argentina entails that results denominated in Argentinian Peso must be adjusted for inflation and be translated at the exchange rate of the balance sheet day which was DKK 5.16 per ARS 100.00 at 30 September 2022, DKK 3.28 per ARS 100.00 at 31 March 2023, and DKK 2.97 at May 9 2023.

3) Estimated average exchange rate is calculated as the average exchange rate year for the first six months combined with the spot rates at 9 May 2023

Nine Continents Medical Inc

Nine Continents Medical Inc is an early-stage company pioneering an implantable tibial nerve stimulation treatment for over-active bladder

The device is an implantable tibial nerve stimulator (ITNS), a miniaturized, self-powered unit placed in the lower leg under local anesthesia during a short, minimally invasive procedure

Coloplast began pivotal studies in early 2022, with the ambition to obtain pre-market approval for a Class III device in the US and EU market. Launch expected in 2025/2026

Transaction

The acquisition price consists of a USD 145 million upfront cash payment and an additional contingent future milestone payment

The acquisition is debt financed using existing credit facilities and has no impact on Coloplast's dividend policy or long-term financial guidance

Why **Implantable Tibial Nerve Stimulation** (ITNS)?

Less invasive procedure than SNS

ITNS complete in **single procedure**
Procedure under **local anesthesia**

Less time-intensive

No need for patients to make regular visits
Providers can **treat patients in one session**

Established data on tibial nerve stimulation efficacy

PTNS established **clinical efficacy**
Urologist familiar with PTNS story

Why **Coloplast's ITNS solution**?

- ✓ No need for patient compliance in therapy
- ✓ Long battery life
- ✓ Focused stimulation field near target nerve

The global Advanced Wound Care market remains large and growing

The Advanced Wound Care market remains a significant value pool and is expected to grow despite the pandemic

Silicone Foams and Gelling Fibers are the two biggest categories and grow faster than the market

2) Includes Alginates & Gelling Fibers

The Wound & Skin Care 2025 strategic plan

In US Ostomy Care we continue to win across patient pathway

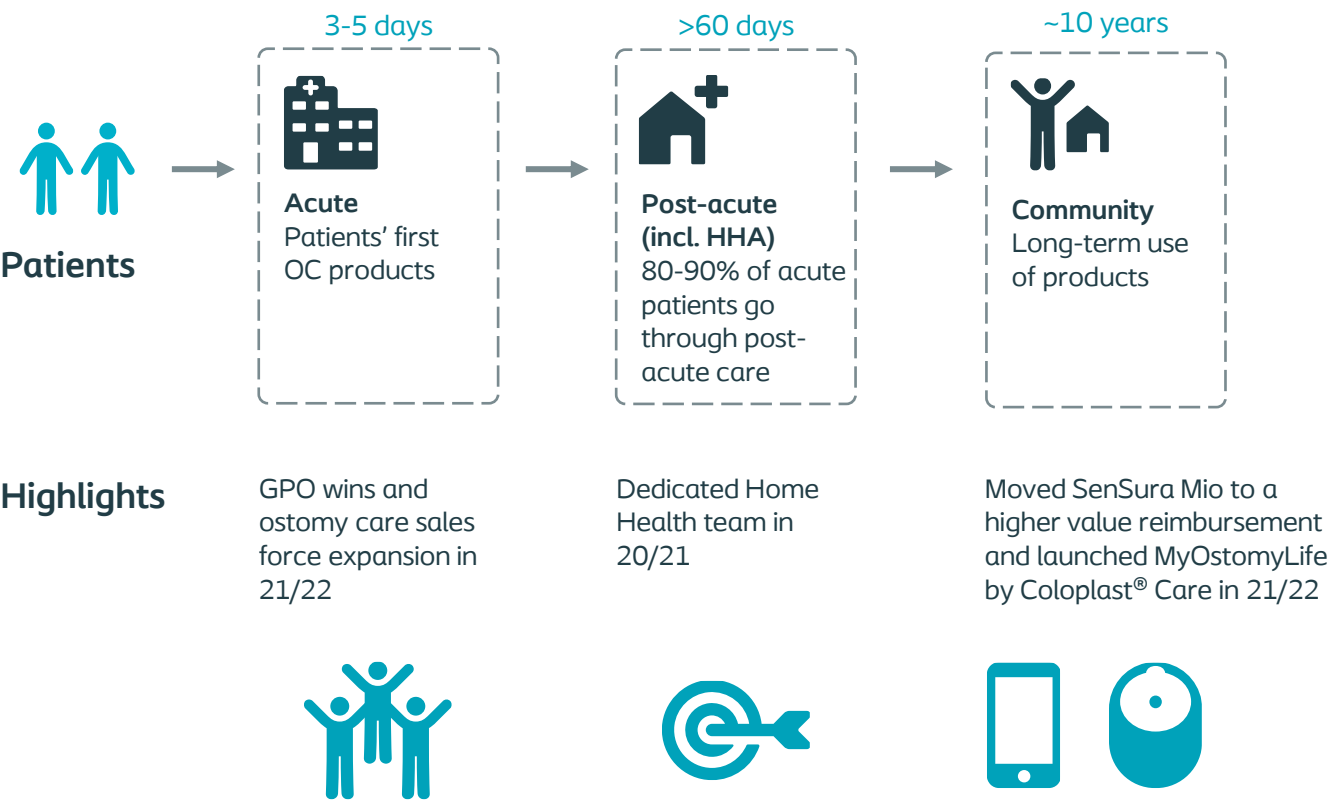

We have gained significant share over the last years

Bags & Plates acute share

Source: Coloplast

... as we work on multiple fronts to win across the patient pathway

Coloplast has been awarded access to Vizient and Premier GPOs, ensuring a level playing field in ~75% of acute accounts

Coloplast has been awarded access to [Vizient](#) and [Premier](#), the two largest GPOs in the US

	Acute members ¹	Estimated Acute share ²	Contract start date	Contract length	Contract type
 PREMIER	3,600	~25%	April 1, 2023	3 years	Multisource
 vizient ^{TM*}	7,500	~50%	July 1, 2021	3 years	Multisource
 HEALTHTRUST ^{TM*}	1,400	~15%	October 1, 2020	3 years	Single source

Source: Coloplast, GHX

1. Acute members can be part of more than one GPO

2. Coloplast estimates based on primary GPO affiliation

* Third party trademarks are the property of their respective owner(s)

Sustainability - key priorities and actions

Improving products and packaging

Reducing emissions

Responsible operations

Why is this a key priority:

As a manufacturer of medical products made primarily of plastic, Coloplast embraces the responsibility to contribute to solving the problems with plastic waste, whilst maintaining the highest level of product safety.

Why is this a key priority:

As a growing company, we are challenged by a potential increase in our environmental footprint. We are rising to the challenge and have set an ambition of 100% reduction of scope 1&2 emissions by 2030¹⁾²⁾ and run 100% on renewable energy by 2025

Why is this a key priority:

Our people and culture are at the center of our Strive 25 strategy. Maintaining and developing a safe, inclusive and diverse working environment is key to delivering on our strategy.

How will we achieve this?

- Redesign packaging for minimal material use and/or switching to bio-based and recycled material in packaging
 - Secondary and tertiary packaging already made of renewable materials and recyclable
 - Focus this strategy period is on primary packing
- Further increase waste recycling through investigating new recycling technologies such as chemcycling, dry agglomeration, as well as new recycling partnerships

How will we achieve this?

- Scope 1 & 2:
 - Renewable energy usage by switching to Power Purchase Agreements (PPAs) and phasing out natural gas
 - Converting company cars to electric vehicles
- Scope 3:
 - 50% emission reduction per product by 2030¹⁾²⁾
 - Limiting the amount of goods transported by air
 - Reducing business travel emissions

How will we achieve this?

- Reducing loss-time injury rate through job-specific training
- Increasing the % of diverse teams and female representation at VP+ level through natural turnover and senior leadership focus
- Engaged workforce above industry benchmark

H1 22/23 progress on key sustainability ambitions

Introducing Ostomy Care

Disease areas

- Colorectal cancer (est. 45%)
- Bladder cancer (est. 10%)
- Diverticulitis (est. 15%)
- Inflammatory bowel disease (est. 10%)
- Other (est. 20%)

Customer groups

- Nurses, mainly stoma care nurses
- People with a stoma
- Wholesalers/distribution
- Hospital purchasers and GPOs
- Surgeons

Call points

- Hospital & community nurses
- Hospital buyers
- Distributors
- Dealers
- Wholesalers
- Homecare companies

Key products

Launched in 2018-2019

SenSura® Mio Convex
Launched in 2015

SenSura® Mio
Launched in 2014

SenSura®
Launched in 2006-2008

Assura® new generation
Launched in 1998

Alterna® original
Launched in 1991

Distribution of revenues*

*Excluding baseplates, hospital assortment, sets and supporting products

Introducing Ostomy Care Supporting Products

Market fundamentals

- Market size of DKK 3-4bn
- Market growth of 6-8%
- Market share 35-40%
- Main competitors include: Hollister Adapt, ConvaTec, 3M Cavilon, Eakin

Customer groups & call points

- Nurses, mainly stoma care nurses
- People with a stoma
- Wholesalers/distributors
- Hospital purchasers and GPOs
- Surgeons

Brava® is a range of ostomy supporting products designed to reduce leakage or care for skin, to make our end-users feel secure. The Brava portfolio was launched in 2012.

Key products

Brava® Protective Seal
Designed for leakage and skin protection

Brava® Protective Seal Convex
Designed for leakage and skin protection

Brava® Skin Barrier
Reducing skin problems without affecting adhesion

Brava® Adhesive Remover
Sting free and skin friendly

Brava® Elastic Tape
Elastic so it follows the body and movements

Brava® Lubricating Deodorant
Neutralizing odour

Market value by geography

- European markets
- Other developed markets
- Emerging markets

Introducing Continence Care

Disease areas

- Spinal Cord Injured, SCI
- Spina Bifida, SB
- Multiple Sclerosis, MS
- Benign prostatic hyperplasia (BPH) & prostatectomy patients
- Elderly

Customer groups

- Continence or home care nurses
- Wholesalers/distributors
- Hospital purchasers and GPOs

Main call points

- Rehabilitation centres
- Urology wards
- Distributors, dealers & wholesalers

Key products

Luja™
Intermittent catheter with
Micro-hole Zone Technology™
Launched in 2023

SpeediCath® Flex Set
Intermittent Set catheter
Launch during 2022-2023

SpeediCath® Navi
Intermittent catheter
Launched in 2019-2020

SpeediCath® Flex
Intermittent catheter
Launched in 2016

SpeediCath® Compact Eve
Intermittent catheter
Launched in 2014

SpeediCath® Compact Male
Intermittent catheter
Launched in 2011

SpeediCath® Standard
Intermittent catheter
Launched in 1999

Conveen® Optima
External catheter
Launched in 2005-2006

Conveen® Security+
Launched in 2013

Distribution of revenues

- Intermittent catheters
- Urine bags
- Male ext. Catheters
- Bowel management
- CC Other

Introducing Bowel Management

Disease areas

Faecal incontinence (management products only)

Customer groups

- Spinal Cord Injured, SCI
- Spina Bifida, SB
- Multiple Sclerosis, MS

Call points

- Rehab centers
- Pediatric clinics
- Urology wards

Key products

Peristeen® Plus Anal Irrigation
Launched in 2021

Peristeen® Anal Irrigation
Launched in 2003
Updated in 2011

Market dynamics

- | | | | |
|---|--|---|--|
| + | Growing awareness | ÷ | Still taboo area and non-focus for professionals (doctors) |
| + | Huge underpenetrated and unserved population | ÷ | Very little patient awareness |
| + | New devices addressing the many unmet needs | ÷ | Training required (nurses, patients) |
| | | ÷ | Lack of reimbursement |

Distribution of revenues

- Peristeen® anal irrigation
- Anal plug

Introducing Voice & Respiratory Care Laryngectomy

Disease areas

- People that have undergone a total laryngectomy, a typical treatment for advanced laryngeal and hypopharyngeal cancer and cancer recurrence

Market dynamics

- 50,000 new total laryngectomy (TL) surgeries performed annually
- Only ~1/3 of patients undergoing TL surgery are treated with products, of which only ~50% use the appropriate amount of products
- Average value per patient is DKK 20-30,000 in mature market

Key products - Laryngectomy

Provox® Life™ Heat and Moisture Exchangers (HMEs)

Provox® Life™ Adhesive

Provox® HMEs

Accessories

Voice Prostheses

Distribution of revenues*

*Based on revenue split from 2020

Introducing Voice & Respiratory Care Tracheostomy

Disease areas

- Performed when the airways are restricted, e.g., during an emergency when the airways are blocked, or when a disease or other problem makes normal breathing impossible.
- Can be temporary or permanent.

Market dynamics

- ~1 million estimated number of procedures globally
- Estimated 20% are permanent (across different patient groups, for example neck and throat cancer patients, neurological diseases, patients with chronic obstructive pulmonary diseases), the rest 80% are temporary
- The market today mainly consists of tubes used for breathing
- Market growth estimated between 3-5%

Key products - Tracheostomy

Freevent® XtraCare™

TrachPhone®

Freevent® DualCare™

Tracoe® twist
Tracheostomy Tube

Portfolio expansion

- Strengthened the tracheostomy product portfolio with the acquisition of the Tracoe® Group.
- The Tracoe Group develops, manufactures, and sells a full and complementary range of tracheostomy care products, including percutaneous dilation sets for the beginning of care

Introducing Interventional Urology Surgical treatment of urological disorders

Disease areas

- Urinary incontinence
- Pelvic organ prolapse
- Erectile dysfunction
- Enlarged prostate
- Kidney and urinary stones

Customer groups

- Surgeons
- Purchasing departments and organizations
- End customers

Call points

- Urologists
- Uro-gynaecologists
- Gynaecologists
- Purchasing departments and organizations

Key products

Titan® Touch Inflatable Penile Prosthesis
Launched in 2013, Men's health

Altis® single incision sling
Launched in 2012
Women's health – Surgical Urology

Isiris® cystoscope
Launched in 2015
Single use devices

JJ stents
Launched in 1998
Single use devices

Thulium Fiber Laser Drive
Launched in 2022
Endourology

Distribution of revenues

- Men's Health
- Women's Health
- Single use devices

Introducing Wound Care

Disease areas

Chronic wounds

- Leg ulcers
- Diabetic foot ulcers
- Pressure ulcers

Customer groups & call points

Hospitals

- Wound care committees
- Specialist nurses/doctors
- (Purchasers)

Community

- Specialist nurses/doctors
- General practitioners
- District/general nurses
- Large nursing homes

Key products

Biatain® Silicone Non-Border
Silicone foam dressing without a border. Launched in 2021

Biatain® Fiber
Reinforced gelling fiber. Launched in 2020

Biatain® Contact
Silicone contact layer. Launched in 2019

Biatain® Silicone Ag.
Antimicrobial foam dressing with gentle silicone adhesive. Launched in 2018

Biatain® Silicone
Foam dressing with gentle silicone adhesive. Launched in 2016

Comfeel® Plus
Hydrocolloid dressing. Relaunched in 2016

Distribution of revenues (WSC)

Introducing Skin Care

Disease areas

- Moisture associated skin damage
- Incontinence
- Skin folds & obesity
- Prevention of skin impairments

Customer groups & call points

Hospitals

- Clinical Specialists
- Supply Chain
- Value Analysis Committee

Community

- Wound Clinics
- Long Term Care
- Home Health Agencies
- Distribution

Key products

Sween®

Broad line of skin care products
Designed to increase consistency of care

Critic-Aid® Clear / AF

Skin Protectant
Suitable for neonate to geriatric patients

EasiCleanse® Bath

Disposable bathing wipes
Improves patient experience

InterDry® Ag

Textile with antimicrobial silver complex
Unique solution for skin on skin issues

Product mix

- Protectants & Antifungals
- Cleansing/Bathing
- Moisturizers
- Textile
- SC Other

At a glance US Skin Care

US Skin Care market

US market size estimated
at **DKK 4-5bn with 2-4% growth**

Market share: 10-15%

Main competitors include:

- Medline Industries
- Sage (part of Stryker)

Market drivers and limiters

- + Aging and obese population
- + CMS Value Based Purchasing
- + Increased focus on prevention
- + Increased importance of utilization management
- ÷ Consolidation of Providers
- ÷ Increased competition from both Channel and Manufacturers

Market trends

- Increasing size and vertical integration of health systems
- Increasing importance of prevention
- Increasing importance of utilization management
- Increasing scale and vertical integration of market leaders

The Coloplast organisation is divided into Chronic Care and Strategic Business Units, running on shared global business support functions

Benefits of a Coloplast ADR programme to US Investors:

- Coloplast has established a sponsored ADR programme in the US, as a service to US investors by offering an alternative way to trade Coloplast shares, while serving to further broaden the company's shareholder base over the long term.
- Clear and settle according to normal US standards
- Offer the convenience of stock quotes and dividend payments in US dollars
- Can be purchased/sold in the same way as other US stocks via a US broker
- Provide a cost-effective means of international portfolio diversification
- Ability to acquire the underlying securities directly upon cancellation
